**Int. Ref. #:**

**Disposition:** CLOSED

**Notes:** On, Saturday July 10, 2021, at approximately 1220 hours, I was contacted by a GHC Employee stating he was standing in the student center gym while working the basketball event. A basketball was thrown and missed the hoop and came towards him. He attempted to catch the ball before it hit the glass behind him and it contacted the tips of his fingers resulting in them being jammed. His middle finger on his right hand swelled the most and induced the majority of the pain. He then notified me, Chief Horace, and stated that he would monitor it and report if the injury became worse. The following day the only finger that showed and swelling was his right-hand middle finger, and he was able to struggle to use it, however there was minimal pain while using it. After treating his hand with ice and anti-inflammatory medication (Ibuprofen), the swelling has begun to subside with no further pain, and he has better mobility.
