

## \_\_\_\_\_ Pathway (Template/Outcome Examples)

### **Program Outcomes**

The \_\_\_\_\_ pathway aims to:

1. Demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings, and historical trends in psychology.
2. Engage in historical inquiry, research, and analysis.
3. Provide students opportunities for co-curricular involvement.

### **Student Learning Outcomes**

Students pursuing \_\_\_\_\_ pathway will be able to:

1. Demonstrate basic knowledge of scientific principles in order to apply scientific modes of inquiry to make evidence-based decisions in an ethical manner.
2. Demonstrate the skills required to collect, analyze and communicate scientific and technical information.
3. Demonstrate the ability locate, evaluate, and synthesize information from diverse sources.
4. Recognize, compare, and apply the core domains of psychology.
5. Identify key events that define change over time in a particular place or region, and identify how change occurs over time
